

Rush App Team Contract

Dennis Smiley, Louis DeScioli, Ben Shaibu, Matt Kerr

Expected level of achievement and effort for each team member

Goal: A's all around

Expected Time Commitment: ~12 hours/week

Personal goals for each team member

Dennis: Improve knowledge of Ruby, improve my skills coding on a team. Learn branches.

Ben: Improve skills with Front-End Development, Experiment with New APIs and gems

Matt: Understand how a more advanced application functions - multiple APIs, different layouts (modal views), more complex data model, learn branches

Louis: Increase understanding and skill with CSS and Ajax

Frequency, length and location of team meetings

Meet on days we don't have lecture during the scheduled lecture time

Try to Arrange Code Jams

If needed, lengthier meetings on weekends (2 hours +)

Location: Remotely via Google hangout, otherwise Student Center 5th Floor

How quality of work will be maintained

Peers will hold each other to a standard.

Mutual respect - will strive not to let the others down

Transparency - will be open and straightforward about what got done, what we're having trouble with, and what we need help with

How tasks will be assigned, and what to do if deadlines are missed

Figure Out Tasklist

Figure Out Who Want to Do What Task (If multiple people want the same task, decide by skill level then Rock-Paper-Scissors)

Assign Leftover Tasks to Whoever has Time

If anyone is falling behind, or has sudden conflicts, that lead to deadlines being missed, the group will immediately identify what tasks are outstanding. These tasks will try to be assigned to the original team member if he is able to complete them; otherwise these tasks will be divvied up among the other team members.

How decisions will be made and disagreements resolved

A decision will be made only if there is unanimous consensus. Disagreements will be resolved civilly. The pros and cons of the decision will be weighed in an attempt to come to a mutual agreement. However if someone is still strongly opposed to the decision, his opinion will be respected.

Git Setup

```
git clone https://github.com/6170-fa13/djsmiley0_lourd_bshaibu_mattyhk_final
cd djsmiley0....
git remote add heroku_group git@heroku.com:vast-retreat-5267.git
```

Git Procedure

Create Feature Branch

Do Changes

Pull All New Changes to Master

Merge Master into Feature Branch

Commit

Merge Feature into Master

Check Site Still Loads

Push
